THERMOCHIMICA ACTA, VOLUME 154

SUBJECT INDEX

Absorption enthalpy,
Enthalpies of absorption of hydrogen sulfide in aqueous diethanolamine solutions 89
Acetonitrile,
Excess enthalpies for ethane + acetonitrile at 298.15, 323.15, and 348.15 K and at 7.5 and 15 MPa 71
Thermodynamics of associated solutions containing acetonitrile and 2-butanol 333
Ag,
A thermometric titrimetry study of Fe^{3+}/SCN^- and Ag^+/SCN^- systems 49
Alkali metal ions,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane–water solvent mixtures 161
Alkanolamines,
Thermodynamics of protonation of alkanolamines in aqueous solution to 325 °C 119
Aluminium,
Reactivity of the ternary fuse head system lead 2,4-dinitrophenolate–lead dioxide–aluminium 247
α-Aminic groups,
Thermodynamics of dipeptides in water. I. Calorimetric study of the influence of α-amino acid structures on the free α-aminic and free α-carboxyl groups 279
α-Amino acids,
Thermodynamics of dipeptides in water. I. Calorimetric study of the influence of α-amino acid structures on the free α-aminic and free α-carboxyl groups 279
Analysis,
Thermogravimetric analysis of bisphenol A copoly(carbonate-thiocarbonate)s 271
Thermomagnetometry and thermogravimetric analysis of carbonyl iron powder 195
Associated solutions,
Thermodynamics of associated solutions containing acetonitrile and 2-butanol 333

Batch injection,
Batch-injection attachment for the Hart DSC 81
Binary mixtures,
Calculation of HE for binary mixtures: some consequences of the conversion of cubic equations of state to hard-sphere versions 107
Bisphenol A copoly(carbonate-thiocarbonate)s,
Thermogravimetric analysis of bisphenol A copoly(carbonate-thiocarbonate)s 271
Butanol,
Thermodynamics of associated solutions containing acetonitrile and 2-butanol 333

Calorimetric study,
Thermodynamics of dipeptides in water. I. Calorimetric study of the influence of α-amino acid structures on the free α-aminic and free α-carboxyl groups 279
Calorimetric titration,
Calorimetric titration analysis of a coal-derived liquid: determination of phenolic, pyridinic, and carboxylic compounds 145
Calorimetry,
Calorimetric, EMF and conductometric studies of engine oils 187
Calorimetry of heterogeneous systems: H^+ binding to TiO_2 in NaCl 129
Carbon dioxide,
Prediction of the excess enthalpies of the carbon dioxide + hexane + toluene system at high temperatures and pressures using the Peng–Robinson equation of state 57
Carbonyl iron powder,
Thermomagnetometry and thermogravimetric analysis of carbonyl iron powder 195
α-Carboxyl groups,
Thermodynamics of dipeptides in water. I. Calorimetric study of the influence of α-amino acid structures on the free α-aminic and free α-carboxyl groups 279
Carboxylic compounds,
Calorimetric titration analysis of a coal-derived liquid: determination of phenolic, pyridinic, and carboxylic compounds 145
Cinnamic acid,
Thermal spectral and magnetic studies of some compounds of cobalt(II), nickel(II) and copper(II) with cinnamic acid 315
Co(II) acetate,
Kinetic analysis of TG data thermal dehydration of Ni(II), Co(II) and Mg(II) acetate tetrahydrates 263
Coal,
Calorimetric titration analysis of a coal-derived liquid: determination of phenolic, pyridinic, and carboxylic compounds 145

Cobalt(II),
Thermal spectral and magnetic studies of some compounds of cobalt(II), nickel(II) and copper(II) with cinnamic acid 315
Cobalt(III) complexes,
Thermal decomposition and mass spectral studies of cobalt(III) complexes with hexadentate dioxime Schiff bases 299
Complex formation,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane–water solvent mixtures 161
Non-covalent interactions in cyclopeptide proton complex formation in aqueous solution 97
Conductometry,
Calorimetric, EMF and conductometric studies of engine oils 187
Copper(II),
Thermal spectral and magnetic studies of some compounds of cobalt(II), nickel(II) and copper(II) with cinnamic acid 315
Correlation,
Correlation and prediction of VLE in ternary systems formed by hydrocarbons and alcohols 287
Opioid structure: lipid thermotropic behaviour correlation study on a series of DPPC liposomes containing opiods 323
18-Crown-6,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane–water solvent mixtures 161
Cryptand-222,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane-water solvent mixtures 161
Cubic equations of state,
Calculation of HE for binary mixtures: some consequences of the conversion of cubic equations of state to hard-sphere versions 107
Cyclopeptide,
Non-covalent interactions in cyclopeptide proton complex formation in aqueous solution 97

Decomposition,
Preparation of potassium tetramolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 219
Thermal decomposition and mass spectral studies of cobalt(III) complexes with hexadentate dioxime Schiff bases 299
Thermal decomposition of pure piroxicam and its surface deposit on amorphous silicon dioxide: mechanism and kinetic data 305
Dehydration,
Kinetic analysis of TG data thermal dehydration of Ni(II), Co(II) and Mg(II) acetate tetrahydrates 263
Densitometry,
Flow calorimetry and densitometry at high temperatures 1
Determination,
Determination of engine oil volatility by thermogravimetry 367
Diacetylmono(lepidyl)hydrazone,
Determination of stability constants and thermodynamic parameters of complexes of diacetylmono(lepidyl)hydrazone (DALH) with lanthanons 213
Diethanolamine,
Enthalpies of absorption of hydrogen sulfide in aqueous diethanolamine solutions 89
Dioxane,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane–water solvent mixtures 161
Dipeptides,
Thermodynamics of dipeptides in water. I. Calorimetric study of the influence of α-amino acid structures on the free α-aminic and free α-carboxyl groups 279

Electromotive force,
Calorimetric, EMF and conductometric studies of engine oils 187
Engine oil,
Determination of engine oil volatility by thermogravimetry 367
Engine oils,
Calorimetric, EMF and conductometric studies of engine oils 187
Enthalpies of combustion,
Standard enthalpies of combustion and formation of porphyrin derivatives 233
Enthalpies of formation,
Standard enthalpies of combustion and formation of porphyrin derivatives 233
Enthalpy,
Excess enthalpies for ethane + acetonitrile at 298.15, 323.15, and 348.15 K and at 7.5 and 15 MPa 71
Prediction of the excess enthalpies of the carbon dioxide + hexane + toluene system at high temperatures and pressures using the Peng–Robinson equation of state 57
Errors,
The effects of errors in α on the mechanism indicated by the Reich and Stivala procedure 225

Ethane,
Excess enthalpies for ethane + acetonitrile at 298.15, 323.15, and 348.15 K and at 7.5 and 15 MPa 71
Evaluation,
Use of thermal analysis for the evaluation of zeolite content in mixtures of hydrated phases 345

Fe^{3+},
A thermometric titrimetry study of Fe^{3+}/SCN^- and Ag^+/SCN^- systems 49
Flow calorimetry,
Flow calorimetry and densitometry at high temperatures 1
Flow visualization,
Kinetic studies of rapid oil shale pyrolysis. I. Temperature characterization and flow visualization in a laminar flow entrained reactor 355
Freeze stress,
An overview of interfacial tension as a component of freeze stress in winter cereal plants 377

Gas calorimeter,
Design and testing of a new isothermal flow gas calorimeter: the Hart field-deployable natural gas energy meter 167
Graphite,
Microcalorimetric study of oxygen adsorption on graphite supported rhodium microcrystals 13

Hart DSC,
Batch-injection attachment for the Hart DSC 81
Hart gas energy meter,
Design and testing of a new isothermal flow gas calorimeter: the Hart field-deployable natural gas energy meter 167
Heterogenous systems,
Calorimetry of heterogeneous systems: H^+ binding to TiO_2 in NaCl 129
Hexane,
Prediction of the excess enthalpies of the carbon dioxide + hexane + toluene system at high temperatures and pressures using the Peng–Robinson equation of state 57
Histone Hl,
Thermodynamic study of the interaction of sodium *n*-dodecyl sulphate with Histone Hl 205
Hydrated phases,
Use of thermal analysis for the evaluation of zeolite content in mixtures of hydrated phases 345
Hydrocarbons,
Correlation and prediction of VLE in ternary systems formed by hydrocarbons and alcohols 287
Hydrogen sulphide,
Enthalpies of absorption of hydrogen sulfide in aqueous diethanolamine solutions 89

Interaction,
Thermodynamic study of the interaction of sodium *n*-dodecyl sulphate with Histone Hl 205
Interfacial tension,
An overview of interfacial tension as a component of freeze stress in winter cereal plants 377

Kinetic analysis,
Kinetic analysis of TG data thermal dehydration of Ni(II), Co(II) and Mg(II) acetate tetrahydrates 263

Laminar flow entrained reactor,
Kinetic studies of rapid oil shale pyrolysis I. Temperature characterization and flow visualization in a laminar flow entrained reactor 355
Lanthanons,
Determination of stability constants and thermodynamic parameters of complexes of diacetylmono(lepidyl)hydrazone (DALH) with lanthanons 213
Lead 2,4-dinitrophenolate,
Reactivity of the ternary fuse head system lead 2,4-dinitrophenolate–lead dioxide–aluminium 247
Lead dioxide,
Reactivity of the ternary fuse head system lead, 2,4-dinitrophenolate–lead dioxide–aluminium 247
Lipids,
Opioid structure: lipid thermotropic behaviour correlation study on a series of DPPC liposomes containing opioids 323
Liposomes,
Opioid structure: lipid thermotropic behaviour correlation study on a series of DPPC liposomes containing opioids 323

Mass spectral studies,
thermal decomposition and mass spectral studies of cobalt(III) complexes with hexadentate dioxime Schiff bases 299
Mechanism,
The effects of errors in α on the mechanism indicated by the Reich and Stivala procedure 225

Melamine,
Solubilities and solution thermodynamics of several substituted melamines 27
Mg(II) acetate,
Kinetic analysis of TG data thermal dehydration of Ni(II), Co(II) and Mg(II) acetate tetrahydrates 263
Microcalorimetry,
Microcalorimetric study of oxygen adsorption on graphite supported rhodium microcrystals 13
Mixing enthalpy,
Calculation of HE for binary mixtures: some consequences of the conversion of cubic equations of state to hard-sphere versions 107

NaCl,
Calorimetry of heterogeneous systems: H^+ binding to TiO_2 in NaCl 129
Ni(II) acetate,
Kinetic analysis of TG data thermal dehydration of Ni(II), Co(II) and Mg(II) acetate tetrahydrates 263
Nickel(II),
Thermal spectral and magnetic studies of some compounds of cobalt(II), nickel(II) and copper(II) with cinnamic acid 315
Non-covalent interactions,
Non-covalent interactions in cyclopeptide proton complex formation in aqueous solution 97

Oil shale pyrolysis,
Kinetic studies of rapid oil shale pyrolysis I. Temperature characterization and flow visualization in a laminar flow entrained reactor 355
Opioids,
Opioid structure: lipid thermotropic behaviour correlation study on a series of DPPC liposomes containing opioids 323
Oxomolybdenum(VI) oxolate complex,
Preparation of potassium tetramolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 219
Oxygen,
Microcalorimetric study of oxygen adsorption on graphite supported rhodium microcrystals 13

Peng–Robinson equation of state,
Prediction of the excess enthalpies of the carbon dioxide + hexane + toluene system at high temperatures and pressures using the Peng–Robinson equation of state 57
Phenol compounds,
Calorimetric titration analysis of a coal-derived liquid: determination of phenolic, pyridinic, and carboxylic compounds 145
Piroxicam,
Thermal decomposition of pure piroxicam and its surface deposit on amorphous silicon dioxide: mechanism and kinetic data 305
Polymeric glass transitions,
Determining polymeric glass transitions using thermogravimetric analysis 255
Porphyrin,
Standard enthalpies of combustion and formation of porphyrin derivatives 233
Potassium nitrosodicyanomethanide complex,
Thermoanalytical study of potassium nitrosodicyanomethanide complex 381
Potassium tetramolybdate,
Preparation of potassium tetramolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 219
Prediction,
Correlation and prediction of VLE in ternary systems formed by hydrocarbons and alcohols 287
Preparation,
Preparation of potassium tetramolybdate by the thermal decomposition of a new oxomolybdenum(VI) oxalato complex 219
Proton binding,
Calorimetry of heterogeneous systems: H^+ binding to TiO_2 in NaCl 129
Protonation thermodynamics,
Thermodynamics of protonation of alkanolamines in aqueous solution to 325 °C 119
Pyridinic compounds,
Calorimetric titration analysis of a coal-derived liquid: determination of phenolic, pyridinic, and carboxylic compounds 145

Reactivity,
Reactivity of the ternary fuse head system lead 2,4-dinitrophenolate–lead dioxide–aluminium 247
Reich and Stivala procedure,
The effects of errors in α on the mechanism indicated by the Reich and Stivala procedure 225
Rhodium,
Microcalorimetric study of oxygen adsorption on graphite supported rhodium microcrystals 13

Schiff bases,
Thermal decomposition and mass spectral studies of cobalt(III) complexes with hexadentate dioxime Schiff bases 299

SCN^-,
A thermometric titrimetry study of Fe^{3+}/SCN^- and Ag^+/SCN^- systems 49
Silicon dioxide,
Thermal decomposition of pure piroxicam and its surface deposit on amorphous silicon dioxide: mechanism and kinetic data 305
Sodium *n*-dodecyl sulphate,
Thermodynamic study of the interaction of sodium *n*-dodecyl sulphate with Histone Hl 205
Solubility,
Solubilities and solution thermodynamics of several substituted melamines 27
Solution thermodynamics,
Solubilities and solution thermodynamics of several substituted melamines 27
Stability constants,
Determination of stability constants and thermodynamic parameters of complexes of diacetylmono(lepidyl)hydrazone (DALH) with lanthanons 213
Surface deposit,
Thermal decomposition of pure piroxicam and its surface deposit on amorphous silicon dioxide: mechanism and kinetic data 305

Temperature characterization,
Kinetic studies of rapid oil shale pyrolysis I. Temperature characterization and flow visualization in a laminar flow entrained reactor 355
Ternary systems,
Correlation and prediction of VLE in ternary systems formed by hydrocarbons and alcohols 287
Thermodynamics parameters,
Determination of stability constants and thermodynamic parameters of complexes of diacetylmono(lepidyl)hydrazone (DALH) with lanthanons 213
Thermomagnetometry,
Thermomagnetometry and thermogravimetric analysis of carbonyl iron powder 195
Thermometric titrimetry,
A thermometric titrimetry study of Fe^{3+}/SCN^- and Ag^+/SCN^- systems 49
Thermotropic behaviour,
Opioid structure: lipid thermotropic behaviour correlation study on a series of DPPC liposomes containing opioids 323
TiO_2,
Calorimetry of heterogeneous systems: H^+ binding to TiO_2 in NaCl 129
Toluene,
Prediction of the excess enthalpies of the carbon dioxide + hexane + toluene system at high temperatures and pressures using the Peng–Robinson equation of state 57

Vapour–liquid equilibria,
Correlation and prediction of VLE in ternary systems formed by hydrocarbons and alcohols 287
Volatility,
Determination of engine oil volatility by thermogravimetry 367

Water,
Complexation of cryptand-222 and 18-crown-6 with some alkali metal ions in several dioxane–water solvent mixtures 161
Winter cereal plants,
An overview of interfacial tension as a component of freeze stress in winter cereal plants 377

Zeolite content,
Use of thermal analysis for the evaluation of zeolite content in mixtures of hydrated phases 345
